ACTIVA

What is Activa?
Activa is an aqueous nutritious extract of decomposed biomass enriched with essential organic constituents.

Mode of action
Activa acts a storehouse of nutrients and plant tonic. It facilitates more balanced delivery of nutrients to plants and soil in an organic form and aids in cell division, cell elongation, tillering and vegetative growth. It influences positively the crop yield, quality and keeping quality of all agricultural and horticultural crops. It induces the production of buds, flowers and fruits. Also it prevents the shedding of buds, flowers and immature fruits.

Features
Ideal organic substrate and it buffers the soil, neutralizing both acid & alkaline soils, bringing pH levels to the optimum range for nutrient availability to plants. Loosens tightly bound particles in clay or silt soil so roots can spread, water drain and air penetrate. Houses millions of micro-organisms and beneficial insects that help the plants to absorb nutrients. Stimulating the growth of microorganisms in the soil, thus ensuring long-term fertility. Non-toxic or harmful to humans and animals.

Benefits
Very nutritious supplement helps plants to grow healthy and strong.
Production of attractive, shiny and superior quality of fruits.
Improves the taste and color of the fruits and vegetables.
Can be used on any type of soil and plant.
Helps the soil to remain clean and fertile. No expiration date.
Avoids environmental pollution by supplementing/minimizing the usage of chemical fertilizers.

Dosage: 1 lit in 100 lit of water
For spraying – 5 ml / litre

Shelf life: Three years

Packing: 1 lit, 5 lit and 20 lit
